Lap of Love Pet
Quality of Life Scale

When evaluating the quality of life of your pet, personalized patient and family information is important when reaching an educated, informed, and supported choice that fits not only your pet’s medical condition, but also your wishes and expectations. In short, quality of life applies not only to the pet, it also applies to you!

**SOCIAL FUNCTIONS**

- ___ Desire to be with the family has not changed
- ___ Interacts normally with family or other pets (i.e., no increased aggression or other changes)

**MENTAL HEALTH**

- ___ Enjoys normal play activities
- ___ Still dislikes the same thing (i.e., still hates the mailman = 0, or doesn’t bark at the mailman anymore = 2)
- ___ No outward signs of stress or anxiety
- ___ Does not seem confused or apathetic
- ___ Nighttime activity is normal, no changes seen

**HEALTH**

- ___ No changes in breathing or panting patterns
- ___ No outward signs of pain (excessive panting, pacing, and whining are most commonly seen)
- ___ No pacing around the house
- ___ My pet’s overall condition has not changed recently

**NATURAL FUNCTIONS**

- ___ Appetite has stayed the same
- ___ Drinking has stayed the same
- ___ Normal urination habits
- ___ Normal bowel movement habits
- ___ Ability to ambulate (walk around) has stayed the same

**RESULTS**

0-8: Quality of life is most likely adequate. No medical intervention required yet, but guidance from your veterinarian may help you identify signs to look for in the future.

9–16: Quality of life is questionable and medical intervention is suggested. Your pet would certainly benefit from veterinary oversight and guidance to evaluate the disease process he/she is experiencing.

17-36: Quality of life is a definite concern. Changes will likely become more progressive and more severe in the near future. Veterinary guidance will help you better understand the end stages of your pet’s disease process in order to make a more informed decision of whether to continue hospice care or elect peaceful euthanasia.

Lap of Love
Pet Family Concerns

I AM CONCERNED ABOUT THE FOLLOWING THINGS:

___ Pet suffering
___ Pet dying alone
___ Not knowing the right time to euthanize
___ Concern for other household animals
___ Desire to perform nursing care for your pet
___ Ability to perform nursing care for your pet
___ Coping with loss
___ Concern for other members of the family (i.e. children)

RESULTS

0-4: Your concerns are minimal at this time. You have either accepted the inevitable loss of your pet and understand what lies ahead, or have not yet given it much thought. If you have not considered these things, now is the time to begin evaluating your own concerns and limitations.

5-9: Your concerns are mounting. Begin your search for information by educating yourself on your pet’s condition; it’s the best way to ensure you are prepared for the emotional changes ahead.

10-16: Although you may not place much value on your own quality of life, your concerns about the changes in your pet are valid. Now is the time to prepare yourself and to build a support system around you. Veterinary guidance will help you prepare for the medical changes in your pet while counselors and other health professionals can begin helping you with anticipatory grief.

DISCUSS THE QUESTIONS BELOW, AND THE ENTIRE QUALITY OF LIFE SCALE, WITH YOUR VETERINARIAN

Below are some open-ended questions that assist gauge your family’s time, emotional, and (when appropriate, financial) budgets:
1. Have you ever been through the loss of a pet before? If so, what was your experience (good or bad, and why)?
2. What do you hope the life expectancy of your pet will be? What do you think it will be?
3. What is the ideal situation you wish for your pet’s end of life experience? (at home, pass away in her sleep, etc.)

Suggestions on using this quality of life scale:
1. Complete the scale at different times of the day, note circadian fluctuations in well-being. (We find most pets tend to do worse at night and better during the day.)
2. Request multiple members of the family complete the scale; compare observations.
3. Take periodic photos of your pet to help you remember their physical appearance.
